

# VIGOR GLOVEBOXES SG Series

- Ultra-low leak rate by patented leak free gaskets
- Fully equipped workstations, plug and work
- Wide range of options to be selected from our "toolbox"
- Vigor Smart Box APP: Remote control by mobile phone or PC

www.vigorgb.com

### **Workstations SG-Series**

l. Gl	Description ove Box	Material Control of the Control of t	Dimensions	Specification
1)	Box enclosure	Stainless steel (US 304; EU 1.4301) Thickness 3mm	Please see page 2 for all available	Inside surface brushed, outside surface white painted
,		, ,	dimensions  Please see page 2 for all available	
2)	Extension modules	Stainless steel (US 304; EU 1.4301) Thickness 3mm	dimensions	Inside surface brushed, outside surface white painted
3)	Detachable front window(s)	Safety glass	Thickness 8mm	Patented vacuum gasket (no-leak seal) for the interfac with the box bodye
4)	Glove ports	Anodised aluminium alloy	Ф8" / 203mm	Patented vacuum gasket (no-leak seal) for the interfa with the window and the glove
5)	Gloves	Butyl rubber	Φ200mm, Length 810mm	Ambidextrous (both hand use) gloves
6)	Supporting frame(s)	Square steel tubing, height: 900mm, 4 castors for eas and 4 leveling feet for placing and leveling the box	y moving	Complete frame painted in white
7)	Integrated KF-flanges for feedthrough's	Stainless steel (US 304; EU 1.4301)	KF40, outside length 20mm	Welded on the box body, single sided to the outside, blind flanged (including flange and clamp)
8)	Height adjustable shelves	Stainless steel (US 304; EU 1.4301)	800mm(W)X170mm(D)	Adjustable or fix installed on demand
	1 Pneumatic purge valve	, , ,	DN25	Outside connection, open KF40 on the top of the valve (possibility to connect to exhaust)
Tec	hnical Specification			
1)	Leak Rate			< 0.001 vol%/hr
2)	Purity Level of the Atmosphere			O <sub>2</sub> < 1 ppm, H <sub>2</sub> O < 1 ppm
3)	Working Gases			Nitrogen, Argon, Special gas on request
. An	techambers			
1)	1 Large antechamber	Stainless steel (US 304; EU 1.4301),	Ф370X600mm	Welded on the side panel of the box enclosure, leak free, auto-evacuation function controlled by the PLC, 1 removable sliding tray
2)	1 Mini ante-chamber	Stainless steel (US 304; EU 1.4301),	Ф150X300mm	Welded on the side panel of the box body, leak free, manually operated by 3-way valve,
				1 removable tray
'. Ga	ns Purification System		_	1 removable tray
	is Purification System  1 Gas purification column, containing copper	catalyst and molecular sieve		1 removable tray  Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg  The column is regenerable and the regeneration is automatically controlled by the PLC
1)	·	catalyst and molecular sieve		Absorption capacity: $O_2 = 60$ liter and $H_2O = 2$ kg The column is regenerable and the regeneration is automatically controlled by the PLC
1)	Gas purification column, containing copper     Organic solvent adsorber	catalyst and molecular sieve		Absorption capacity: $O_2 = 60$ liter and $H_2O = 2$ kg The column is regenerable and the regeneration is automatically controlled by the PLC Activated carbon, pre-dried
1) 2) 3)	1 Gas purification column, containing copper			Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h)  PLC controlled valves, enabling automatic control of the
1) 2) 3) 4)	Gas purification column, containing copper     Organic solvent adsorber     Gas tight circulation blower			Absorption capacity: $O_2 = 60$ liter and $H_2O = 2$ kg The column is regenerable and the regeneration is automatically controlled by the PLC Activated carbon, pre-dried Flow rate $60 \text{ m}^3/\text{h}$ , $(110\text{V}: 45 \text{ m}^3/\text{h})$
1) 2) 3) 4) 5)	Gas purification column, containing copper     Organic solvent adsorber     Gas tight circulation blower  Valves for circulation, regeneration and box p			Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure
1) 2) 3) 4) 5)	Gas purification column, containing copper     Organic solvent adsorber     Gas tight circulation blower     Valves for circulation, regeneration and box p     Vacuum Pump: RV 12 (Edwards)			Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure
1) 2) 3) 4) 5) . Sys	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stern Control			Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h)  PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure  Pumping speed 12 m³/h (Including oil mist filter)
1) 2) 3) 4) 5) Sys 1) 2)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply			Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max
1) 2) 3) 4) 5) Sys: 1) 2) 3)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply 1 Foot-switch	ressure control		Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user
1) 2) 3) 4) 5) Sys 1) 2) 3) 4)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply 1 Foot-switch Touch screen panel, color, 7"	ressure control		Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h)  PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure  Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user Interface language: English or Chinese
1) 2) 3) 4) 5) Sys 1) 2) 3) 4) 5)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply 1 Foot-switch Touch screen panel, color, 7" 1 Electrical feedthrough and power strip instal	ressure control		Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h)  PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure  Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user Interface language: English or Chinese Inside / outside connection with country specific plugs
1) 2) 3) 4) 5) . Sys: 1) 2) 3) 4) 5) 6)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply 1 Foot-switch Touch screen panel, color, 7" 1 Electrical feedthrough and power strip instal Programmable logic controller	ressure control  led in the box		Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user Interface language: English or Chinese Inside / outside connection with country specific plugs Siemens SIMATIC S7-200 SMART
1) 2) 3) 4) 5) System 1) 2) 3) 4) 5) 6)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply 1 Foot-switch Touch screen panel, color, 7" 1 Electrical feedthrough and power strip instal Programmable logic controller Automatic evacuation of the large antechamb	ressure control  led in the box  er		Absorption capacity: O <sub>2</sub> = 60 liter and H <sub>2</sub> O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user Interface language: English or Chinese Inside / outside connection with country specific plugs Siemens SIMATIC S7-200 SMART Unattended operation, number of cycles settable by the user It typically works 5 minutes every hour. Saves energy
1) 2) 3) 4) 5) Sys 1) 2) 3) 4) 5) 6) 7)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower  Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards)  stem Control  Power supply 1 Foot-switch  Touch screen panel, color, 7" 1 Electrical feedthrough and power strip instal  Programmable logic controller  Automatic evacuation of the large antechamb  Gas purification system works on demand  controlled by oxygen and/or moisture analyze  Fully integrated control of heated antechamb	ressure control  led in the box  er		Absorption capacity: O2 = 60 liter and H2O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user Interface language: English or Chinese Inside / outside connection with country specific plugs Siemens SIMATIC S7-200 SMART  Unattended operation, number of cycles settable by the user It typically works 5 minutes every hour. Saves energy and extend the blower lifetime User settable target values
1) 2) 3) 4) 5) . Syst 1) 2) 3) 4) 5) 6) 7) 8) 9)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply 1 Foot-switch Touch screen panel, color, 7" 1 Electrical feedthrough and power strip instal Programmable logic controller Automatic evacuation of the large antechamb Gas purification system works on demand controlled by oxygen and/or moisture analyze Fully integrated control of heated antechamb Automatic leak rate testing	ressure control  led in the box  er  er, freezer and box cooling		Absorption capacity: O2 = 60 liter and H2O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user Interface language: English or Chinese Inside / outside connection with country specific plugs Siemens SIMATIC S7-200 SMART Unattended operation, number of cycles settable by the user It typically works 5 minutes every hour. Saves energy and extend the blower lifetime User settable target values Alerting users of damaged gloves or gaskets
1) 2) 3) 4) 5) System 1) 2) 3) 4) 5) 6) 7) 8) 9)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply 1 Foot-switch Touch screen panel, color, 7" 1 Electrical feedthrough and power strip instal Programmable logic controller Automatic evacuation of the large antechamb Gas purification system works on demand controlled by oxygen and/or moisture analyze Fully integrated control of heated antechamb Automatic leak rate testing Automatic box pressure control, working pres	ressure control  led in the box  er  er, freezer and box cooling		Absorption capacity: O2 = 60 liter and H2O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user Interface language: English or Chinese Inside / outside connection with country specific plugs Siemens SIMATIC S7-200 SMART Unattended operation, number of cycles settable by the user It typically works 5 minutes every hour. Saves energy and extend the blower lifetime User settable target values Alerting users of damaged gloves or gaskets The PLC will automatically control the box pressure within the set of
1) 2) 3) 4) 5) Sys 1) 2) 3) 4) 5) 6) 7) 8) 9)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply 1 Foot-switch Touch screen panel, color, 7" 1 Electrical feedthrough and power strip instal Programmable logic controller Automatic evacuation of the large antechamb Gas purification system works on demand controlled by oxygen and/or moisture analyze Fully integrated control of heated antechamb Automatic leak rate testing Automatic box pressure control, working pres Automatic purge	ressure control  lled in the box  er er, freezer and box cooling  sure user settable, range +10 to -10mbar		Absorption capacity: O2 = 60 liter and H2O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user Interface language: English or Chinese Inside / outside connection with country specific plugs Siemens SIMATIC S7-200 SMART Unattended operation, number of cycles settable by the user It typically works 5 minutes every hour. Saves energy and extend the blower lifetime User settable target values Alerting users of damaged gloves or gaskets The PLC will automatically control the box pressure within the set of
1) 2) 3) 4) 5) Sy: 1) 2) 3) 4) 5) 6) 7) 8) 9) 1) 2)	1 Gas purification column, containing copper 1 Organic solvent adsorber 1 Gas tight circulation blower Valves for circulation, regeneration and box p 1 Vacuum Pump: RV 12 (Edwards) stem Control Power supply 1 Foot-switch Touch screen panel, color, 7" 1 Electrical feedthrough and power strip instal Programmable logic controller Automatic evacuation of the large antechamb Gas purification system works on demand controlled by oxygen and/or moisture analyze Fully integrated control of heated antechamb Automatic leak rate testing Automatic box pressure control, working pres	ressure control  lled in the box  er er, freezer and box cooling  sure user settable, range +10 to -10mbar		Absorption capacity: O2 = 60 liter and H2O = 2 kg The column is regenerable and the regeneration is automatically controlled by the PLC  Activated carbon, pre-dried Flow rate 60 m³/h, (110V: 45 m³/h) PLC controlled valves, enabling automatic control of the circulation, regeneration, and box pressure Pumping speed 12 m³/h (Including oil mist filter)  Single phase 220-230 VAC, 50 Hz, 230 VA max For individual adjustment of the box pressure by the user Interface language: English or Chinese Inside / outside connection with country specific plugs Siemens SIMATIC S7-200 SMART Unattended operation, number of cycles settable by the user It typically works 5 minutes every hour. Saves energy and extend the blower lifetime User settable target values Alerting users of damaged gloves or gaskets The PLC will automatically control the box pressure within the set of

For options like antechamber on the left hand side panel, heated antechambers, T-antechambers, rectangular antechambers, extended antechambers, dual column gas purification systems and a wide range of feed-throughs, please see the related specific datasheets or contact your Vigor representative.
